

COMMUNICATIONS BRIEFCASE

SECURE MOBILE COMMUNICATION

The **Communications Briefcase** is a complete mobile secure communications solution. Providing a full business day of operation under normal usage, the **communications briefcase** is ideally suited for remote environments that require secure access to office resources.

Secure audio, video and conference calling is provided and a secure ethernet connection for personal computers or laptops is provided as well.

The **Communications Briefcase** is secured via a built in encryption unit (**SOLIDnet™**), providing IKEv2 and IPSec based encryption for all traffic.

Multiple connectivity options are supported including a dual SIM Card LTE modem, satellite modem or ethernet network.

The **Communications Briefcase** lasts up to 10 hour under normal use and can be recharged via wall socket using the included charger.

A battery charge indicator allows active monitoring of battery level.

Secure text messages and document exchange is available on the phone using standard Android 7.0 Applications.

A waterproof keyboard with trackpad is provided in addition to the touchscreen on the phone.

The **Communications Briefcase** provides a turnkey solution for temporary base communications, from almost anywhere in the world, with the highest level of security.

Specifications
